WORLD HAPPENINGS
BRIEFLY TOLD

Robert E. A. Graham, one of Canada's foremost livestock men and one of the best judges on the continent, died in Toronto, June 14.

Henry Roy Davis, of Milner, B.C., fourth year medical student at McGill University, will represent Canadian universities at Wembley during the month of August.

Prof. Basil Williams, of McGill University, is to succeed Sir Richard Lodge, who is retiring, as head of the department of history at the University of Edinburgh.

Perla has withdrawn from the arms conference because of the conference decision that Perla ships in the Gulf of Persia could be searched if suspected of engaging in forbidden arms traffic.

The tomb of Virgil at Naples has been purchased by the Italian Government and a large sum will be expended in restoring the ancient Latin poet's resting place as part of this year's celebration in his honor.

Mrs. Marusa Tretyko, wife of a Russian colonel, has been sentenced to death for her activities as head of a notorious group of anti-Soviet bandits who terrorized the whole of the Ukraine for more than two years.

An extensive programme of dental health, embracing examination and dental service to immigrants, was outlined at the annual meeting of the Canadian dental hygiene council held at Toronto.

"Trade between Canada and India is developing steadily with an increasing market offering for timber and machinery," said H. A. Chisholm, Canadian trade commissioner at Calcutta, who arrived in "Victoria" recently on board the liner Empress of Russia.

The Jerusalem correspondent of the London Daily Mail says the shrine of the Holy Sepulchre has been completely destroyed by a fire which broke out in the night. The fire was caused by a gas leak from a gas lamp.

Dr. Mack Easman, professor of history at the University of British Columbia, will leave in a few days for Geneva, where he will be in the employ of the department of labor of the League of Nations.

Continued with a number of the League of Nations. The committee reached that will make the United States a member of the world court. Sir George Porter expressed this opinion in an address at Montreal on the League of Nations.

Many Compliments For
Empire Exhibition

Wembley Show This Year Could Not Be Improved On

The finished and much improved appearance of the British Empire Exhibition this year has been generally recognized and has shown the subject of complimentary comments. The opening of the big show at Wembley. The beautiful gardens, the wonderful illuminations, the catering for the big crowd, and the entire layout of the exhibition have little, if anything, that could be improved upon. Unfortunately, through the misreading of a Canadian Press cable recently in connection with a comparison which was made between the Wembley show and the International show at Paris, it was made to appear that the former was not in readiness at the opening, whereas the Paris exhibition was. What was intended to be conveyed in the cable was that the Wembley show had emerged with complete credit with its readiness for receiving visitors from the opening day onward.

Canada and New Zealand
Some idea of Canada's trade with New Zealand can be gathered from the fact that exports from Canada during the month of February, 1924, amounted to \$1,823,777, of which amount \$183,560 was made up of agricultural and vegetable products, while wool, wood products and paper amounted to \$173,243. The greatest amount was furnished by iron and iron products, exports of which in the month of February amounted to \$187,745.

Animals Being Acclimatized

Ninety sacred ibexes from Abyssinia have reached the London Zoo, and until acclimatized, will be put into a cage supplied with radiant heat and light. Shattered by the outside the cage will be electrically warmed by rays of artificial sunshine.

Why blame the hotel patron for picking when he has to pay good dollars for poor quarters?

W. N. U. 1662

Believe In Success
Of Non-Stop Flight

French Aviators Preparing For Paris-New York Trip

"Our chances of success are five in 100, and that is sufficient," said Paul Taronen, war-trained aviator, when questioned about the proposed Paris-New York non-stop flight which he and another aviator, Francis Coli, will attempt this summer.

The big jump can be made. Given a smooth working motor and a sound navigating plane with a lifting capacity sufficient to take off with enough fuel to stay in the air 30 hours, the Paris-New York flight is no more difficult than several feats performed in recent years. Coli opted.

Expert mechanics are now busy tuning up the motor, while plane builders are putting the finishing touches to the machine. The latter part of July has been fixed as the probable time.

Five thousand litres of fuel and oil when the plane must carry at the start present a problem. How to store this liquid without interfering with the stability of the plane is causing the experts much anxiety.

England, Ireland, Newfoundland, and Nova Scotia is the proposed itinerary.

Sweden Developing
Electrical Power

Intends In Time To Electrify All Of Its Railroads

After having ruled supreme for 100 years, steam is being routed in Sweden as motive power in transportation both on land and sea. The most recently published statistics show that of all the boats now under construction in Swedish shipyards, more than 80 per cent. are to be propelled by motors, and on the railroads the old-fashioned locomotives are being discarded in favor of electric engines or motor trucks. Having no coal and plenty of water power, Sweden intends in time to electrify all its railroads.

In the meantime motor driven trucks are rapidly displacing the steam engines on shorter hauls. The Helsing-Naxmo line, for instance, now converts an ordinary automobile into a railroad truck, capable of hauling three and a half tons at 25 miles an hour. Railroad trucks with four-wheel drive, and more under construction.

To Rebuild Minaki Inn

Guests Will Be Accommodated at the Lodge and Rest is Open at Uval

Immediate steps will be taken to rebuild the Minaki Inn, burned to the ground recently. Loss through fire to buildings and equipment has been estimated at \$150,000, fully covered by insurance. The management of the Canadian National Railways announces that preparations have been made to accommodate guests at the Lodge at Minaki, which was undamaged by fire. New equipment to be installed in this building under the management of Mr. J. T. Knight, will permit the opening for the reception of guests on June 27. The lodge was originally intended for the accommodation of winter guests and one of the most substantial buildings at Minaki.

The fire destroyed only the main building and contents. The dance pavilion, beach, swimming accommodation and ice house were untouched by flames and will be operated as in past years. The entire course was in no way damaged by the fire.

Winnipeg Summer Fair

Educational Features Will Occupy An Important Place

Educational features will have an important place in the Winnipeg summer fair, as more than three hundred feet of space have been set aside, and will be devoted to special demonstrations and instructive subjects, dealing with all subjects affecting the city, home and nation.

Among the set pieces to be seen during the two weeks will be those dealing with early trade with the Indians; the granting of the royal charter by King Charles II. in 1670; Prince Rupert; the first governor of the Hudson's Bay Company; Sir Robert Moresworth Kinross, G.B.E., the present governor, the purchasing of the Red River by the Indians; King George V. Queen Mary; Lord Byron; Lord Selkirk; Sir Arthur Currie; Sir James Aikins; Premier John Bracken; Mayor R. H. Webb; City Clerk Chas. Brown; flags; provincial and city emblems; coat of arms of Canada; historical events; and other famous personages.

There is no future in being a Russian statesman.

THE NEW CHATEAU LAKE LOUISE

This new nine-story hotel, occupying the ground space of an entire city block, was taken over from the contractors two weeks before its opening on June 1, by the Canadian Pacific Railway. It is the new Chateau Lake Louise, built last winter at a cost of two million dollars the base of the famous Lake Louise 6,500 feet in the Canadian Rockies.

To equip this new hotel and stock it with food for guests occupying the hotel, 1,800 heads, 220 barrels, 750 chairs, 300 pieces of upholstery, 300 desks for rooms, with sheets and pillow cases, bed and springs and other equipment to match, had to be transported three and a half miles up a narrow gauge mountain railway. The perishable food which had to be stocked in the hotel the day before its opening, included 11,000 pounds of turkey, 8,000 pounds of roasting fowl, 15 whole lambs, 15 whole hogs, 1,000 pounds of new potatoes, 40 cases of grapefruit and 20 cases of fresh apples. Approximately 7,000 eggs had to be raised from the C.P.R. farms at Strathcona, Alberta, and placed in the refrigerators.

Of the non-perishable foodstuffs, five tons of potatoes, 200 sacks of flour, 20 tons of sugar, 2,000 pounds of butter, a ton of tea and a thousand cases of canned goods had to be placed in the landers.

All told, a special train of eight cars carrying 250 tons of foodstuffs was required to open this remarkable edifice. And all of this had to be rushed in at the last moment; for the opening banquet at the hotel seated the full capacity of the new dining rooms of 500 persons.

A staff of 425 men and women, including three managers, had to be on hand a week before its opening. These employees have a building to themselves equipped with rooms with bath, hot and cold running water, a rotunda and a ballroom.

The new Chateau Lake Louise has 400 rooms with bath, all outside rooms, with bath, with southern exposure facing the famous lake.

Besides telegraph and cable offices in the rotunda, bed bedroom contains a phone which can be connected with long distance.

A resident doctor and trained nurse will have offices in this building to look after the health of its guests; and a special dining room has been built for the made, nurses and young children of the guests.

Chateau Lake Louise is now said to be the largest and most modern equipped chateau in the world.

Wheat Outlook In U. S.

Large Percentage of Winter Wheat Acreage Has Been Abandoned

If wheat goes to a fancy price next fall, American farmers will not be the principal beneficiaries. The crop in this country does not promise very well according to a government report, says the Buffalo Express. More than half the winter wheat acreage was abandoned in Washington, Montana, Oregon, New Mexico and Texas, and nearly a quarter of the acreage in the entire country. Estimates as to spring wheat acreage are not yet accurate, but the guess is that it will not be above the average as to either quantity or quality producing countries.

Canada is reported to have planted an acreage fully as large as last year, with soil conditions and moisture excellent. Prospects in other countries are good, also, it is said. This country may not have much exportable surplus wheat this year. That will mean a benefit to other producing countries if the price, as is expected, remains high.

Powerful Indian Prince Dies

The Maharajah of Gwalior, one of India's richest and most powerful princes, died suddenly in Paris. He was cremated in modern style, wearing his royal robes and with all his jewels, after efforts had failed to have his body burned on a great open air funeral pyre in Paris, in accordance with his religious rites.

Bamboos, when young, can be snapped off and eaten like asparagus.

Award Road Contracts

Saskatchewan Government Spending Considerable Money In Road Improvements This Year

Considerable road improvement is being carried out in Saskatchewan during the present season and the Provincial Government recently let contracts for road work totalling \$47,000. The new work includes improvement of the road from Maudsland east for nine miles, at a cost of \$13,000; improvement of the road from Saskatoon to Grandfork at a cost of \$12,000; improvement of the road from Maudsland north for six miles at a cost of \$7,500; improvement of the road from Corbin to West, five miles, at a cost of \$1,600; and improvement of the road from Kenaston to Hanley at a cost of \$12,400.

Improvement of a road from Treasdale east at a cost of \$12,000; improvement of road from Quill Lake to Watson and three miles north of Watson at a cost of \$16,000.

World Scarcity In Wheat

Factor That Will Likely Hold Prices Up For Some Time

Blue ribbon gentlemen, who do not like to see the farmers happy, tell them that high wheat prices cannot last because those prices are supported solely by speculation.

They say that the bottom may drop out of the wheat market any day that some speculating giant wants it to drop. The farmers should not worry too much about it. There is one factor that will probably hold wheat prices up for years.

Normally, Russia produces one billion bushels of wheat. For the past few years Russian wheat has not been a factor in world wheat markets. Now it is a factor for years to come—Vancouver Sun.

Best Pasture For Hogs

Sudan grass had a slight superiority over Marrow-stemmed kale in a test made with Berkshire and Yorkshire hogs at the Central Experimental Farm, Ottawa, in 1923. There was little difference in the actual feeding value of the two pastures, but the Sudan was ready earlier than the kale and supplied green feed for a period of nine days longer.

The Soft Answer

Persistent Interrogator:—"Liar! Liar!"

Speaker:—"If my friend will give me his name instead of his question, I shall be delighted to make his acquaintance."

Sauce For
The Goose

More Co-operation and a Better Understanding Needed Between the East and the West

At the dinner given by the Quebec division of the Canadian Manufacturers' Association, an attempt was made to have all the provinces represented on the bill of fare. Saskatchewan was represented by "Beef, Bacon and Ham," while Alberta was recognized by serving "Assorted Cold Cuts."

These are all very light refreshments to represent the hearty ones of old of the plains, but what else could one expect from such an organization? They represent very well the amount of consideration Western Canada has received at their hands. A little Saskatchewan salad, over which is poured some Manitoba sauce, with a few Alberta assorted cakes as a tit-bit may do as a filler, but as substantial fare will not go far in satisfying a young, strong robust man.

Now, these people's professions are taking up to the Canadian manufacturers something far more substantial upon which they are feeding sumptuously every day. We in the west are but humans like the rest of folk. It gives us pleasure to help another; it also affords us pleasure when we receive, with good grace, from others. Western Canada is certainly doing its part to place our country on the map. Its products are known world-wide and we are today contributing considerably to the wealth of Canada. We feel, therefore, that there is a little more to be asked for than the assisted cake coming to us when our wishes and needs are being discussed by our eastern friends.

If you give a person too much of any one food, it becomes nauseating and a variety must be made if full development is to be attained. The west feels that a little change in the diet would be very beneficial if full development is to be hoped for, and as our prosperity is soon reflected by prosperity in the rest of the world, it is difficult to have a change brought about. This can be done by a little more sympathetic co-operation between the middle class of the west and the rest of the world. If both are to develop as we hope, but a little less selfishness will be as helpful as the highly publicized of what the west wants, the prosperity and greatness of Canada.—Monsieur Jans.

Price Cattle Shipped

Big Shipment Is Made Of Price Cattle From Alberta

The first consignment of export cattle for 1925 left Montreal recently, consisting of two hundred and some head shipped by the Livestock Producers' Association of Alberta, and averaging around twelve hundred pounds in weight at the time of shipment. One hundred and twenty-five of the number came direct from Edmonton springing from the farms of the province, the first five prices in the calendar. Others landed in the lot were the grand champion steer formerly owned by the late Mr. J. H. McLeod, of Hereford stables that took first place at Regina, Calgary and Saskatoon shows.

May Buy Another Farm

South African Farming Has Gently Interested Prince of Wales

With regard to a report that the Prince of Wales has entertained the idea of returning to South Africa for big game shooting, the general impression is that His Royal Highness is not particularly interested in big game and his rooms to be born out by his recent cancellation of a projected visit to a game reserve.

The Prince, however, throughout his tour in South Africa, has shown the deepest possible interest in farming, and South African farmers who have spoken to him think it quite possible that he may buy a farm and encourage horse breeding and the raising of sheep and dairy cattle in this country.

Canada's Fruit Production

Fruit production in Canada during 1924 had a value of \$2,126,421, a decrease from the figure of the previous year, due principally to smaller crops of apples, according to a bulletin of the federal bureau of statistics. The following are the principal crops: Apples, \$1,177,607; strawberries, \$471,294; raspberries, \$1,398.

An orderly officer, visiting the tents, asked if there were any more tents, and one soldier got up and said, "Yes, sir, there are."

"Why? It's the best soup I have ever tasted in my army career."

"But," said Tommy, "it's supposed to be tea."

CASE THRESHERS

All Steel—Are unequalled for clean threshing and saving the grain.

Are in a class by themselves! Durable and dependable and simple to operate for all work.

E. D. THYGESEN CASE DEALER OYEN, ALBERTA

The Tourist's Eternal Triangle

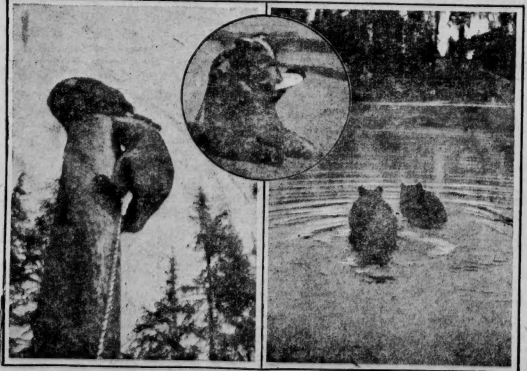

Someone has just published a book about Canada. It is only a little book—about eighty pages. It contains an astonishing amount of information. It will tell you how many cities there are in Canada; how many people there are in those cities; how many bushels of wheat were grown in 1924 and how much money the government makes out of the business of governing. It will also tell you, incidentally, that Victoria, B.C. is one of the most beautiful cities of the world and that Vancouver has the second finest harbor there in anywhere.

That is the sort of book to publish. There is nothing vague, nor indefinite nor yet inaccurate about the information it gives. It says, if at all, in being a trifle too modest. Victoria is indeed one of the most beautiful cities in the world, but that is not all one can say about it. It is the capital of British

Columbia and as such is the centre of the province's recreational, industrial, and social activities and that's saying a whole lot. Look at its bathing beach. No wonder the citizens have built the second finest harbor in the world. They have a great and beautiful slab of the Pacific Ocean to fling themselves and each other into to revive their weary bodies and minds whenever the business of operating their famous harbor becomes burdensome.

These two cities are linked with each other and with Seattle, to the south, by what is known as the 'Kathleen', of the Canadian Pacific Coastal service is a member. The 'Kathleen' recently made her inaugural trip on this route and is now permanently on the service.

BLONDIE AND BRUNETTE COME TO TOWN

When they showed up, first is Blondie finishing supper. Taking a swim in the icy cold water. They never were brighter little bears, no, nor smarter ones. They will keep you entertained always! And it was all pretty true. But winter was coming and as they had been brought up by humans, the guides feared that their native instinct would not assert itself even though they had spent the summer with humans. So the stupid humans learned that all the chads should be pulled down in the little house and all the cuds drawn, and in crawled the two little bears, and when only a day or two later, when one of the guides went to look, they still had their little green-brown eyes partly open but were too sleepy to even be interested in their favorite meal of caken and syrup. And soon they were off to the Land of Nod to dream sweet dreams until snows grew soft and they could venture out if the sun were bright enough to cast their shadow. And when that time finally came, the first words they heard were the old familiar ones: "How they have grown!"

Monster Masonic Picnic

at Sibbald Beach July 8

The Masonic Lodges of Oyen, Sibbald, Alaskan and Lovers are uniting in a monster joint picnic at Sibbald Beach on Wednesday, July 8. A very cordial invitation is extended to all Masons and their families to be present. A program of sports is arranged for the afternoon, commencing at 2 p.m. and all are urged to be on hand in good time to participate in the fun.

Fifth Crop Report

Issued by Department of Agriculture
Edmonton, Alberta, June 20, 1928

Rains which have been general throughout the entire province during the past two or three weeks have produced crop conditions more favorable than the province has seen for ten years. At the present time, with the exception of districts where cut worms have been active, the condition of the growing crop may be said to be very satisfactory, and indicative of a heavy yield.

Since last reports rains have visited almost every district in the province in varying amounts. In some districts precipitation has been so heavy as to render the highways almost impassable. In practically all districts a vigorous crop growth is being witnessed, and in fact all plant growth is greater than has been seen for a number of years. The prospects may be said to be much better than at this time in 1923, because the satisfactory conditions are more general.

The following reports of rain have been received, and these are broken out fairly indicating the province. The reports cover for the most part the first two weeks of June. Raymond, 2.50 inches; Peace River, good rains; Lacombe, 3 inches since May 27; Olds, 1.70 inches in June to date; Youngstown, 1.07 inches in June; Jerns, 3.25 Vermilion, 1.75 inches; Medicine Hat, one to two inches within ten days; Vegreville, 1.75 inches in June; Sedgewick, 2 inches since last report; Lethbridge, heavy rains in whole district.

Further reports on acreage indicate that the general increase in wheat will be from 5 to 10 per cent. The hay crop will be heavy, and there is a big increase in corn and other fodder crops in the south. The new sugar beet crop in the Lethbridge territory is doing well.

Several hail storms have occurred during the past week, but the damage is small thus far. Cutworms have done considerable damage in the east central district and will be responsible for a smaller yield than otherwise would have been obtained. Grasshoppers have been active in the Peace River and Grande Prairie districts but are under control.

The Liberal convention held in Cereel last Thursday drew an enthusiastic gathering. George Campbell of Youngstown received the nomination as candidate for the Acadia Constituency, getting a majority vote over William Deaton, after other nominees had withdrawn. Hon. C.R. Mitchell was present and gave an interesting address. Another convention will be held in Hanna on July 3.

B.H.Dial will sell by public auction the household effects of Mrs. J.W. Ennis, in Oyen on Saturday afternoon, July 4th.

Weather conditions continue to be most favorable and crops are showing great growth.

LEGAL NOTICES

Municipal District of Cereel No. 242

NOTICE IS HEREBY GIVEN under Section 48 of The Domestic Animals Act (Municipalities) that every light bay gelding, white face, right hind foot white, no visible brands, large limp on side of head, was impounded by the pound kept by the undersigned, John McKenzie, located on the West 22-284 W. 1, on the 16th day of April 1928 and that the said animal was sold on the 1st day of June 1928, to F. L. Warnock of Oyen, Alta.

And that one black filly, both hind legs and the off front leg white no brands was impounded in the pound kept by the undersigned, T. Abbott, located on the N.E. 1-92-1 W. 1, on the 23rd day of May 1928, and that the said animal was sold on the 8th day of June 1928, to W. B. Atkins of Oyen, Alta.

And that one sorrel mare, about two years old, white face, branded O or G on right hip, was impounded in the pound kept by the undersigned, W. J. Aids, located on the N.W. 1-28-2-5 W. 1, on the 18th day of May 1928, and that the said animal was sold on the 1st day of June 1928, to E. S. Hogan of Excel, Alta. And that one bay mare, about two years old, blazed face, branded either O or G or G, on right hip, two white hind feet, two black front feet, was impounded in the pound kept by the undersigned, W. J. Aids, located on the W. 1-28-2-5 W. 1, on the 18th day of May 1928, and that the said animal was sold on the 18th day of June 1928, to C. Godfrey of Excel, Alta.

And that the said animals may be redeemed by their owners within their behalf within a period of thirty days from the publication of this notice in the Alberta Gazette, and payment of all fees and costs due to the municipality and the purchasers of said animals.

For information apply to the undersigned.

W. H. Peterson, Secretary-Treasurer
Municipal District of Cereel No. 242

How is your subscription? If it increases your address label will show you.

Here and There

Starting accidents, we are in for the greatest wheat crop in the history of Canada," says Andrew Kelly of the Western Flour Mills. Mr. Kelly thinks the prairie wheat crop this year is off to the best start it ever had.

The first lot of Scottish boys enrolled as farm apprentices for Canada arrived recently on the Canadian Pacific liner "Metagama." They were brought out under the auspices of the British Immigration and Colonization Association in co-operation with the Canadian Pacific Railway.

Canada's progress in the world of letters is illustrated by the fact that there is a Canadian literary section as one of the features of the Canadian Exhibition at the British Empire Exhibition at Wembley. It presents French-Canadian and English-Canadian literature from the earliest dates down to 1924.

Ten conventions, comprising almost 3,000 delegates, will be held in Montreal between now and August 31, according to an announcement by the Montreal Tourist and Convention Bureau. It is hoped to obtain from the 1926 Kiwanian Convention for this city which would mean that some 7,000 Kiwanians will visit Montreal next summer.

The Crystal Gardens, the splendid new pleasure resort for the city of Victoria, B.C., will be opened at the end of June and will form one of the unique attractions of that city. It will be both a winter and summer garden and possesses a salt water swimming tank, claimed to be the largest on the continent. Citizens of Victoria are already using the Gardens prior to its official opening.

Screening at the Capitol Theatre, Montreal, of the scenes through which the University of Montreal, across-Canada trip and the similar journey of the Teachers' Federation of Canada will pass, attracted a large and appreciative audience. The film was a revelation of the beauty of Canadian cities and scenery. The University of Montreal trip will start from that city July 7 and return July 28. The trip of the Teachers' Federation will commence July 20 and will conclude August 10.
